ABOUT US

Asia Bulk Sacks' mission is to be a technical skill and quality driven FIBC manufacturer, focusing on the higher-risk market segments such as Food products, Chemicals, Fine Powders, and Hazardous goods.

We do this by fostering a skill driven work culture, rigorous product development, customization and testing, and an emphasis on technical service - building trust and lasting partnerships with our customers

Asia Bulk Sacks Pvt. Ltd is a manufacturer and exporter of Food Grade and Industrial Clean FIBCs (Bulk Bags / Big Bags / Jumbo Bags), based in the western part of India near Ahmedabad, Gujarat.

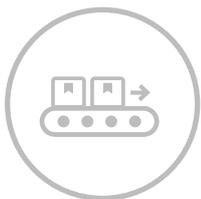

40

Years of experience

Sectors we serve:
Sugar, Peanuts, Fertilizers, Polymers,
Chemicals, Minerals, Cement, Mining,
Animal Feed etc.

3.5

Million FIBCs manufactured annually

35

countries exported to

Risk Mitigation

Product liability insurance to mitigate the third party claim risk to the extent of One million USD.

Expertise in polymer market over 40 years of experience in polymer trading and trends.

Expertise in Foreign exchange market we engage foreign exchange experts to develop hedging solutions and avert risk in volatile times.

Research oriented approach -

- World class in-house laboratory to test the product according to the international standards.
- We study the application and then develop solution to meet customer need.
- Dedicated R&D professionals who continuously work on improving product quality, cost effectiveness, raw material and additives and automation.

Quality claim policy -

- We stand guaranteed to any manufacturing defect (within FIBC safe handling guidelines).
- We have a proud history of quick response, product replacement or rework, and effective claim settlement.

Technology Driven Top of the line machinery, and always one of the first to experiment and implement new developments in the market.

Sustainable growth -

Details on pages 5 and 6.

Added Value to our customers

Same day response (subject to time zone), and maximum 24 hours for more complex designs.

Quick and quality sample production, Despatch within 3 working days for standard designs, and 7 days for customized designs.

Technically skilled account handlers which provide complete end-to-end service, from inquiry till delivery.

Fast lead times - our despatch times are 3-4 weeks for standard designs.

Logistics expertise to address shipping challenges, and use the fastest sailing vessels. We also offer DDP/DDU terms, and LCL shipments. Our closest port is **Mundra** - India's largest container port.

Excellent partnerships with other quality manufacturers for sourcing non-standard inputs and developing new designs.

We aid in inventory management by keeping desired stock in our BRC certified warehouse.

We can offer up to **7 specifications in the same container.**

As **members of IFIBCA and FIBCA - and various other organisations,** we stay updated on all elements in the market and our knowledge base is a benefit to our customers.

We work with **select customers in each geographical region,** building strong partnerships and mutual growth with like-minded quality conscience users.

CATALOGUE

FIBC Designs and customizations

Our FIBC Designs:

U+2 panel
4+1 panel
Circular FIBCs
Baffle-FIBCs / Q-bag
Tubular Baffle / Circular Baffle
One / Two loop FIBCs

Customizations

- Single, double, triple dust proof seams
- Standard Baffle | Net Baffle | Gambo Liner Baffle | Tie Baffle
- Corner & cross corner loops
- FIBCs with conical top / bottom
- Ventilated FIBCs

Liners options:

- EVOH Liner
- EVA Liners
- Heat Stable - PP Liner
- Foil Liners
- Baffle Liners
- Anti-static Liners
- Nylon Liners
- HDPE Liners / MDPE Liners

Liner insertion options : Form fit, Tabbing, Glued and Flange

Sustainable solutions:

Recycled PP FIBCs with upto 30% recycled content (without any strength loss)

Reusable/Multi- FIBCs (upto 8:1 safe working load)

Hazardous/Specialized goods handling solutions :

UN certified FIBCs for dangerous goods

APC Approved Peanut Bags

TYPE C (conductive)

TYPE D (dissipative) FIBCs
Our type D technology is certified and meets IEC61340-4-4 requirements

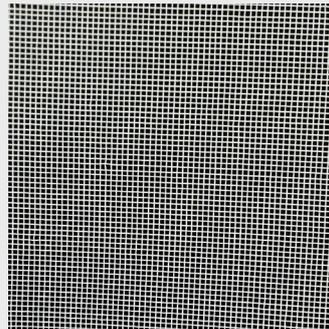

Flame retardant bags
Tested as per BS 5852 requirements

Some special Designs and Solutions :

Aluminium liner (with baffles)

HDPE mesh fabric

Circular / Tubular baffle bags

Remote release spouts

Octagonal FIBC

Our in-house R&D department is dedicated towards evolving innovative solutions for challenging applications. It is a joy for us to work on highly customized and out-of-the box designs.

SUSTAINABLE PRODUCTION

ZERO WASTAGE

All our waste is recycled and reused in-house

GREEN ENERGY

1MW solar power installation

ZERO POLLUTION

No release of any pollutants in air or water by using Carbon filtration and STP plant

RECYCLING AS A MECHANISM FOR GROWTH

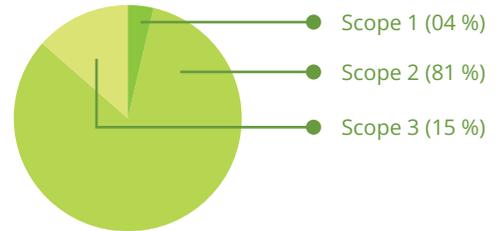

R&D efforts into recycling methods and consumption of recycled materials without compromising strength and quality.

OUR CARBON FOOTPRINT

IN 2021
Total emissions :
5028 t CO₂ eq. / year

IN 2022
Total emissions :
3681.416 t CO₂ eq. / year

Total emissions 2022 breakdown

Through current initiatives we have reduced our carbon footprint by 26.8%

OUR GOALS

Achieve 3MW solar power generation by 2025 (80% of our consumption)

Halve our current carbon footprint, emissions, by 2028

FIBCs are 100% recyclable

A 1.2 kg FIBC can safely hold 1000kg of product. That equates to 1.2g / kg of product by far the least amount of packaging material one can use.

SUSTAINABLE QUALITY

“ Our work in training and skill retention is perhaps the most important ingredient in sustaining and growing our quality-driven vision. Making FIBCs remains a very human process, and it is our investment in our skilled employees that sets us apart. In other words, our ethics directly equates to our quality ”

- Aditya Gandhi, Director

OUR ETHICS AND WORKPLACE CREDENTIALS:

ABS provides many additional benefits to retain skill and minimize employee turnover. Some of these include:

- Accommodation and meals.
- Reimbursement of school tuition fees for employee’s children.
- Help in relocation of employee’s family
- Reimbursement of medical bills and onsite doctor visits.

As a part of its Corporate Social Responsibility, ABS provides education and vocational training to underprivileged areas, without any discrimination on caste or creed.

OUR FACILITY

- Integrated facility from tapes to finished bags with BRC Global Standards certification (GRADE A)
- FDA approved resin and food grade inputs.

ABS strives to be a lean, efficient, skill and technology oriented facility, utilizing automation solutions wherever possible.

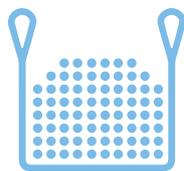

State-of-the-art **Clean Room Facility with (10+5) micron air filtration AHU** which filters the air better than conventional air conditioners
Complete facility from extrusion to packing, and storage has filtered air

Mitigating Risk:

Full Traceability

Strength & Load testing

UV testing

Contamination Controls

Surface Resistivity test

- Nilesh Gandhi, CEO
IFBCA President (2023-2025)

The way forward:

“ Our vision is to be the most technically proficient FIBC manufacturer in the country - which is best summed up by our philosophy of ‘quality over quantity’.

We will achieve this firstly, by prioritizing skill development, secondly, by adopting automation, technology, and product developments, and finally, by becoming sustainable. We don't believe in buzzwords without substance - but rather investing in practical solutions - drastic reduction to our carbon footprint, and R&D into ‘circular economy’ solutions.”
